Art.1 - Aim

We, the community actors living in South Tyrol, agree to work together to improve the quality of life, economic prosperity, local environment and public health by affirming the common interest of our residents, workers, business community, public institutions, finance and civil society organisations in promoting a just pattern of development in which planet, profit and people are equally valued.

We agree to act through the networking created by the NAWI community, embracing public and private actors, private business and public policy, within a consistent collective action towards a just transition to a green economy, in which green employment and environmental health are the ends of community action.
